

Job Title: Information Security Technical Analyst

Department: IT

Location: Kings Hill

We are looking for an experienced Information Security Technical Analyst to our expanding IT department.

This position will reach well beyond the scope of typical Information Security role. It will require out-of-the-box thinking, as the Information Security Team is heavily consulted on a wide range of items.

As a member of the Information Security Team, you will also contribute to security-related initiatives such as Internal and External Information Security Audits, Digital protection, Business Continuity, and Vendor Management processes.

Key Responsibilities

- Threat monitoring and intelligence gathering.
- Perform information security reviews of the core business and group businesses, as well as third parties.
- Provide advisory and consulting support to help the Company improve its security posture and adhere to security policies, expected controls & regulatory requirements.
- Proactively identify information security deficiencies or opportunities for improvement and facilitate development of pragmatic solutions.
- Serve as a key liaison point between the IT Security Team and the business gaining business support for IT controls and security efforts.
- Travel to other CCM sites located within the UK and Europe to help and support, as and when required.

Knowledge & experience

- Graduate or Graduate Caliber or Information Security experience
- Minimum of 3 years of related information and cyber security experience within Financial Services or similar regulated organization
- Experience in articulating complex requirements as easy to understand security designs to all levels of the organisation.
- Strong technical experience in, and management of, each of the following areas:
 - Information security monitoring (e.g. Tenable Nessus, OpenVAS, Qualys, QualysGuard).
 - Security incident response (e.g. Splunk, , SolarWinds, AlienVault, , LogRhythm,)
- Access management, including privileged access management (e.g. CyberArk, SailPoint,, Bomgar)

Disclaimer -The above statements are intended to describe the general nature and level of work being performed by people assigned to this role. They are not to be construed as an exhaustive list of all responsibilities, duties, and skills required of personnel so classified. All personnel may be required to perform duties outside of their normal responsibilities from time to time, as needed to meet the ongoing needs of the organisation.

Personal Attributes

- Excellent problem solver, coupled with good analytical skills
- Strong technical and organizational skills
- Demonstrates a positive and flexible attitude
- Able to demonstrate ability to cope with fast moving / demanding environments and adaptability
- Strong stakeholder management skills as well as strong written and verbal communication
- Ability to work in under pressure.
- Ability to work in a team
- Collegiate approach
- Up-to-date view of Enterprise technology

The following would be DESIRABLE, not essential:

- Experience in working banking or finance organization.
- CISA, CISSP, CISM or similar qualifications
- Detailed technical knowledge of networks and networking protocols in use (including TCP/IP, Port usage, UDP packets and payload analysis).

What can we offer you?
