

Job Title: Senior Test Engineer

Department: IT

Location: Kings Hill

An exciting opportunity has arisen for a Senior Test Engineer to join our IT Department. We are looking for a bright self-starter with significant testing experience as well as experience in test automation.

The role of the Senior Test Engineer is to assure that software deliverables meet the project/delivery requirements. Assure that the test framework for Cabot Credit Management systems are robust and efficient.

You will work closely with project managers, business analysts, and developers to validate and verify requirements defined for software changes, and work closely with our customers to help conceptualize new features, and ensure that our solutions meet our customer's expectations.

Some of the key responsibilities include:

- Identify Test target and identify Test ideas
- Define test details, assessment and traceability needs
- Determine test (expected) results
- Define test approach
- Define test environment configuration
- Identify test techniques
- Structure the test implementation
- Define testability elements
- Implement tests and test suites
- Analyse test failure
- Report defects and test outcomes
- Create Test Progress summaries for SCRUM Master/Project Managers
- Provide technical support for internal and external users of our platform: troubleshooting, setting up and integrating new clients, testing client integrations, etc

Knowledge & experience

- ISEB/ISTQB Foundation Certificate
- Computer Science or IT degree (desirable)
- Significant testing experience and experience in test automation
- Experience in setting up an automation framework.
- Keyword/data driven testing experience
- Experience in design of regression test suites and smoke tests
- Experience in design and execution of performance, and load tests
- Experienced in System testing – Functional and non-functional
- Good understanding of the Software Development Life Cycle and system architecture
- Good knowledge of MS Office products
- Tools: HP QC, TFS, C#, SQL, XML, SOAP UI, REST API test tools

Disclaimer -The above statements are intended to describe the general nature and level of work being performed by people assigned to this role. They are not to be construed as an exhaustive list of all responsibilities, duties, and skills required of personnel so classified. All personnel may be required to perform duties outside of their normal responsibilities from time to time, as needed to meet the ongoing needs of the organisation.

What can we offer you

We are offering a competitive salary of £45,000-55,000 depending on experience, and loads of fantastic benefits, such as 23 days holiday, gym subsidy, pension scheme, healthcare cash back scheme, travel insurance, on site massage and health checks plus much, much more, so if you are interested in this exciting opportunity please apply now.
