

**Job Title:** Pricing Analyst

**Department:** Analytics

**Location:** London

---

An exciting opportunity has arisen for an experienced Pricing Analyst to join our Analytics department in our brand new office in London.

The primary focus of the role is working within a central analytics team providing support and oversight to pricing and portfolio performance related analytical work undertaken by our teams across our pan-European business. As a part of a dynamic team, working closely with local analytical teams in each geography and Business Unit teams, you will help ensure delivery of expected returns to investors and maximize profitability.

Working within a central function this role will require effective communication and strong relationships with analytical colleagues and senior management across multiple Business Units. Success in this role will require strong analytical skills coupled with pragmatism, a 'can do' attitude and a willingness for international travel.

### **Key Responsibilities**

- Develop and maintain a detailed understanding of the non-performing loan market
- Understand valuation methodologies used within each international market and asset class
- Intuitive understanding of the dynamic interaction between portfolio characteristics and expected performance
- Independent support and challenge to portfolio valuation work undertaken by local analytical teams
- Second line oversight to identify risks to future performance
- Sharing of insight and tools across assets and geographies with the objective of maximizing opportunities
- Identification of pragmatic solutions to balance risk management against typical transaction timeline limitations
- Portfolio performance monitoring including working closely with local Business Units to challenge and understand significant drivers of variance in investment returns vs. expectations
- Portfolio returns re-forecasting
- Ensuring adherence to Group governance standards including documenting key decisions and accurately capturing expected investment economic return data
- Collaboration and concise communication with senior management to summarise and quantify risks and opportunities

### **Knowledge & Experience**

- Highly numerate and detail oriented, preferably with a degree in a quantitative field such as mathematics science subjects, economics or engineering
- Extensive experience in an industry that deals with high volumes of data with hands-on work of pricing consumer debt portfolios a distinct advantage.
- SQL for data querying/ programming and an understanding of relational databases
- SAS or R experience a distinct advantage
- PC literate. Microsoft Excel, Word, PowerPoint, Access and Visual Basic is preferred

**Disclaimer** -The above statements are intended to describe the general nature and level of work being performed by people assigned to this role. They are not to be construed as an exhaustive list of all responsibilities, duties, and skills required of personnel so classified. All personnel may be required to perform duties outside of their normal responsibilities from time to time, as needed to meet the ongoing needs of the organisation.

- Strong analytical and quantitative skills
- Understanding of debt purchase processes and collections strategies
- Knowledge of statistical sampling techniques such as Stratified sampling as distinct advantage
- European language skills or working experience a distinct advantage

### **What can we offer you?**

We are offering a competitive salary depending on experience, as well as a fantastic bonus scheme and great benefits so if this sounds like you and if you would like to join our rapidly expanding company, then we would love to hear from you!
